## **Media Outlets**

We are writing to ask that you look at the video and photos below. While we understand that you must report on subjects and news send from your superiors; we are simply asking for you to view the below and decide for yourself if this is "Fake News"

Our purpose is not to start controversy and this is not political. We are mothers, fathers, teachers, grandparents and concerned citizens. There are tens of thousands of us behind this letter. We are concerned not only about the safety of the children in these photos and videos, but our own children and children around the world. It is our job to question suspected child abuse especially when there is an abundance of overwhelming evidence.

As a person in the media, we count on you to also inform, investigate or simply even question any form of child abuse or neglect. If you are not willing to do this as part of your job, would you please consider looking into this as a concerned citizen as well?

We have spent months researching and archiving evidence. Many of us have lost time at work and have spent nights sleepless because we are so concerned about the child abuse, sex abuse and child trafficking we have uncovered.

Please give us and these children some hope.

Sincerely,

**Concerned Citizens.**
